DETAILED ACTION

Allowable Subject Matter

1. Claims 4-6, 9-11, and 16-28 are allowed.
2. The following is an examiner's statement of reasons for allowance:

U. S. Patent No. 5,790,334 to Cunningham is the reference closest to the claimed invention. Cunningham discloses a method of determining a magnitude of a sensing current to be supplied to an electromagnetic transducer, comprising: supplying an electric current of a first current value to the electromagnetic transducer; determining a physical quantity appearing in the electromagnetic transducer based on the electric current of the first current value; supplying an electric current of a second current value, different from the first current value, to the electromagnetic transducer; determining the physical quantity appearing in the electromagnetic transducer based on the electric current of the second current value. However, Cunningham does not teach determining a numerical value of a variation in temperature of the electromagnetic transducer based on the change in the physical quantity and determining the magnitude of the sensing current based on a determined numerical value of the variation in temperature of the electromagnetic transducer; and including all of the other limitations in the respective independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
